Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-56 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weder (5111613) in view of the English abstract of Japanese Patent 47029902.

Weder relates to a method of making a decorative flower pot or floral grouping cover comprising the steps of providing a flower pot or a floral grouping, providing at least one sheet of flexible, polymeric material and forming the sheet into a flower pot covering or floral grouping cover (abstract and col. 2, lines 49-54). As described in Weder, the cover includes a base (12) and a decorative border (14). The base, as shown in the drawings, has a closed lower end, an open upper end, an outer peripheral surface, an inner peripheral surface and a retaining space, and the base is provided with a plurality of overlapping fold that are connected with together (col. 2, lines 33-48). The skirt or decorative border extends outwardly. The cover can be of thin polymeric film material having a thickness of less than 1 mil to about 30 mils (col. 3, lines 36-42). The film can be of a single layer or a plurality of layers of same or different material (col. 3, lines 27-31). The presence of multi-layer film would provide for water imperviousness. The cover is provided with decorative pattern formed, embossed, printed or otherwise disposed on the outer peripheral surface thereof. The pattern can be printed designs, coatings,

flocking, metallic finishes, etc. (col. 3, line 64 to col. 4, line 3). However, Weder fails to teach expressly that the printed or embossed pattern would simulate the texture or appearance of paper. The English Abstract of Japanese Patent 74029902 discloses the formation of paper-like sheet with colored pattern by embossing the thermoplastic polymeric film. Therefore, it would have been obvious to one having ordinary skill in the art to utilize the English Abstract's teaching of using embossing to simulate the texture or appearance of paper onto a polymeric film in the invention of Weder with the motivation to provide for aesthetic appeal and strength.

The features of presence of acrylic heat sealable lacquer, colored adhesive, pressure sensitive adhesive, etc. are disclosed in US Patent 4,773,182 which is incorporated by reference into the Weder'613.
